Finding words or numbers in PDF documents

You can use the Find command to find a complete word or part of a word in the current PDF document. This function looks for the word by reading every word on every page in the file, including text in form fields.

You can easily use Find command "**Ctrl+F**" by holding Ctrl key and striking F key.

AIRKRAFT

CONVOLUTED AIR SPRINGS

AIRKRAFT

ABOUT US

Established in Bursa Freezone since 2000, AIRKRAFT produces a wide range of airsprings including Convoluted, Cabin, Seat, Lift-Axle and Belt Tensioner types. At the end of 2009, AIRKRAFT moved to its new plant to reach a total of 9.000m² covered area, in two locations.

Being a leader in the domestic market since 2000, Airkraft today exports approximately 80% of its production to more than 70 countries worldwide.

Built upon Aktaş Group tradition and experience of more than 70 years, we are taking secure steps towards our goal of being a world renown company. In order to secure our product quality and these steps, we have upgraded our quality certificate to **ISO TS 16949**. Moreover, supplying all our raw materials from the Group, provides us a guaranteed chain of production until the finished product and maximum traceability down to the root.

Along with a vast number of tests done on raw materials (adhesion, ageing, resistances etc.), Airkraft also cinches the standard quality by applying many in-house tests such as impermeability, force, burst, dimension changes, hysteresis, tragkraft etc.

Cultivated by big name customers across the world including OEM companies, we are proud to bring OE attention and quality to AM customers.

CONVOLUTED AIRSPRINGS

Classified as single, double and triple, convoluted airsprings increasingly replace pneumatic cylinders in the world industry.

With higher course length, compactness, ease of usage and low maintenance costs, convoluted air springs offer the performance in lifting, compression, suspension and eliminating vibration both under vehicles and machines.

Convoluted airspring production in Turkiye first began in the late 70's under Aktaş Group flag. Now Airkraft proudly provides local OEM brands as a sole supplier since 2000 as well as aftermarket customers.

CABIN AIRSPRINGS

Used in the truck and tractors' cabin as four point suspension, the cabin airsprings provide much more comfort in comparison to its preceeders, steel springs. Combining traditional shock absorbers with air springs instead of coil springs, this hybrid solution to suspension significantly eliminates vibration.

Since 2000, Airkraft supplies cabin airsprings and sole sleeves to leading European shock absorber producers.

SEAT AIRSPRINGS

Drivers' seat air springs provide a new breed of seat suspension, lowering fatigue, and health risks frequently faced by drivers. Eliminates the vibration for the most important part of the truck, the driver, and keeps the seat at an adjustable height at all times.

Besides supplying the aftermarket, Airkraft also supplies leading global seat producers.
