

Park Ranger 2150 Snow Sweeper

The snow sweeper clears up to 15 cm of light, fluffy snow. The lateral float ensures a problem free passing over kerbs or other obstacles.

The brush swing is controlled hydraulically from the operator's seat and can be angled left or right according to the wind direction. The brush unit is bi-directional, which makes it possible also to clean snow from narrow places where the machine is unable to make a turn.

Working at the same time with the salt and sand spreader the driver is able to remove the snow and spread the salt in one pass and thereby quickly provide a safe route for the motorists and pedestrians.

With the Park Ranger 2150 the changeover from one attachment to another is done in less than 4 minutes - no tools required!

Technical data

Snow Sweeper

3,020 mm

1,220 mm

Special features

Hydraulic control

Adjustable sweeping direction

Can be combined with the salt and sand spreader for double efficiency

Dimensions

Attached:

Length	3,020 mm
Width	1,220 mm
Height	1,935 mm

Storage dimensions:

Length	900 mm
Width	1,220 mm
Height	650 mm

Technical data:

Weight	103 kg
Clearing width	1,140-1,220 mm
Sweeping capacity	10-12,000 m ²
Brush cylinder rpm	255 rpm
Brush diameter	550 mm
Ground clearance below brush	420 mm
