About the brand Gletcher

Gletcher is a brand of pneumatic guns and accessories, established by SMG Inc. Our slogan, "Military Precision", emphasizes the high level of implementation of our air guns both in function and design. It also reflects the passion it evokes in our customers.

In creating the Gletcher brand and products, we tried to fill a void for customers who appreciate firearms but due to cultural and regulatory issues were unable to own these types of items. In the United States, Gletcher replica air guns are used by owners of real firearms to maintain their shooting skills. In Europe, where firearm legislation is very strict, Gletcher air guns provide enthusiasts with the rare opportunity to capture the spirit of owning legendary firearms. In other regions of the world, Gletcher has become a popular replica sidearm for airsoft players. Our brand has taken a leading position in the pneumatic gun market in many countries thanks to our quality and the authentic implementation of our air guns.

SMG Inc. prides itself on delivering excellent customer support. Each Gletcher air gun comes with an 18 month warranty. We do our best to provide warranty service for our products sold throughout the world through our network of distributors and retailers.

REVOLVERS

About the Revolver Line

A revolver is an embodiment of brilliant simplicity. This weapon keeps its classic spirit even in the modern world. Gletcher reproduces not only the visual effect of the revolver, but its distinct feeling as well. There is almost no difference in handling a real revolver and its Gletcher air version.

The way we see it,
the revolver is not
a revolver without its
rolling cylinder.

With full metal construction, similar weight and dimensions, and decorative cartridges, Gletcher has captured the feeling of handling the world's most famous revolvers. We do our best to make the entire shooting process (beginning with loading and ending with the emptying of the cylinder) as authentic as possible.

AIRGUNS

Gletcher
military precision

About the Air Gun Line

Gletcher's primary goal was to create pneumatic guns that simulate the feeling of shooting a real firearm. Features like full-metal construction, movable slides (blowback system), and realistic recoil all add to the realism of the Gletcher experience. Our replica's weight, dimensions, and characteristics make our guns the next best alternative to the real thing.

Design and Performance

Our air guns include some unique models and designs exclusive to the Gletcher brand. We strive to replicate not only the external aesthetics of a firearm, but the internal mechanisms as well. This gives these air guns the feel of an authentic sidearm. Gletcher air guns are a balance between functionality and historical accuracy, the combination of which captures the essence and nostalgia of the original design.

BLOWBACK: The blowback system provides recoil movement and simulates the feedback offered in the original weapon.

**FULL
auto**

FULL AUTO: Gletcher full auto models.

The Second World War was a period of great prosperity for small arms. During these grave years of conflict, the merits and excellence of personal weapons were at their peak. Weapons from this era are classic masterpieces.

RUSSIAN LEGENDS

"Russian Legends"
These models come in unique boxes designed
specifically for the "Russian Legend" series.

Gletcher
military precision

About the line

During the Cold War, it would have been impossible to imagine that an airgun version of a Soviet weapon could ever be produced by an American company. Soviet small arms were considered to be some of the best in the world and they have become rather popular in the United States.

The Gletcher "Russian Legends" series was introduced as an easy way for weapons enthusiasts to experience legendary Soviet and Russian pistols Stateside. Our Russian Legends series includes models that were first debuted by Gletcher and, in some cases, are still exclusive to our brand today.

About the Airsoft Line

Only by using it in the field can you truly understand the design of a gun. Both airsoft players and historic reenactment teams will appreciate Gletcher's Airsoft line.

Most models are made from a metal alloy, their weight and dimensions are identical to the original firearms. Working slides and a blowback system adds realism to the shooting experience. All of the most popular Gletcher models are available in two calibers: .177 (4.5 mm) and 6 mm airsoft.

ACCESSORIES

 **Gletcher**
military precision

The Gletcher philosophy emphasizes safety, a respect for the authenticity and realism of the weapon, and an unparalleled shooting experience.

When creating high quality air guns we simply could not ignore accessories. Our shooting glasses, sights, compact tactical flashlights, and belt holsters are all intended to provide a comfortable and safe shooting experience. They are also an effective tool to practice gun handling and develop operating skills.

Since 2012, Gletcher has been producing its own line of glasses for shooting. All Gletcher glasses conform to ANSIZ87.1 standards developed by the American Institute of Standardization.

Ammunition

High-quality materials and strict quality control eliminates technical problems while using Gletcher ammunition. In addition to the CO₂ cartridges and targets, we offer service kits that ensure a maximum lifespan for your gun.

Gletcher pistols are sold throughout many countries in the world. Unfortunately, the quality of ammunition available in some areas does not meet Gletcher standards. By producing our own ammunition, we can guarantee our customers an exceptional shooting experience and ensure the longevity of your Gletcher gun.

About SMG Inc.

SMG Inc. is an American company specializing in the production of pneumatic guns, training weapons, and accessories. We pride ourselves on making products with the highest level of performance, quality, and craftsmanship.

When developed properly, the skill of handling a side arm becomes a form of art. Millions of people around the world seek this level of proficiency. Gletcher air guns and accessories were created by real weapons enthusiasts. Their high level of implementation allows our customers to train more safely, affordably, and conveniently than with a real firearm.

At SMG, Inc. our mission is simple, to create products that fulfill the demands of their owners, wherever they may be. Whether you're a collector, a sports shooter, or a backyard plinker, there's a Gletcher air gun that will suit your needs and put a smile on your face.

SMG Inc. is a member of the National Rifle Association (NRA)—the longest-standing civil rights organization in the United States.
