MEDICAL & BEAUTY

**Design**

Salon Ambience boasts the prestige of Italian creativity, a design that captures the beauty of simplicity, and the fusion of technical expertise and contemporary needs. Italian Design leaves a striking, exciting impression.

**Products**

Salon Ambience products are rigorously MADE IN ITALY, a strong choice that ensures top quality and the highest production standards.

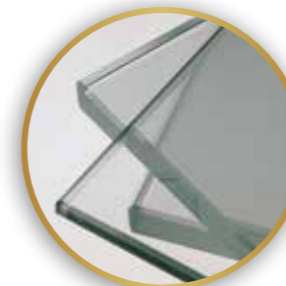

**Sky Colours**

Salon Ambience upholstery complies with industry regulations, and is characterised by high abrasion resistance and a strong elasticity to maintain an attractive appearance over time. All Salon Ambience products are upholstered by qualified personnel.

**Mirrors and Glass**

All mirror and glass materials are MADE IN ITALY; the production of the thick glass offers high resistance, and the tempering and etching treatments offer increased flexibility and durability, creating safer materials.

*Salon Ambience*

**Pumps**

The hydraulic (oleodynamic) pumps used by Salon Ambience are a completely MADE IN ITALY production; high-tech machinery and manual assembly guarantee the highest possible quality of every single piece.

**Wood**

Salon Ambience relies on the work of expert carpenters for the manufacture of a variety of products containing wood, as well as bespoke furniture. The multilayer wood materials used for padded chairs promise a total resistance, even when put under heavy stress, or placed under heavy weights.

# Salon designs

The products that carry the Salon Ambience trademark are today synonymous with creativity and durability, and aim to improve not only the customer's workspace, but also the quality of the work itself, giving life to a pleasing, welcoming atmosphere that aids relaxation, and allows the hair stylist freedom of expression in the workplace.

## 2D

A two-dimensional design, created at the Salon Ambience Design Centre. This format is used to show the customer the exact layout of their new salon.

## 3D

After the 2D design comes the 'photo-rendering', a design which incorporates 3D, colours and textures into the design. This is an extremely useful tool for showing somebody exactly how their salon will look when finished.

## Rendering

Another design showing the possibilities of the 'photo-rendering' tool, this time from inside the salon. This can allow the possibility to show more specific details of the salon.

## Salon

When the project design is accepted by the salon owner, it is then possible to start work on fully realising the new salon.
